- E. SESSION SUMMARY

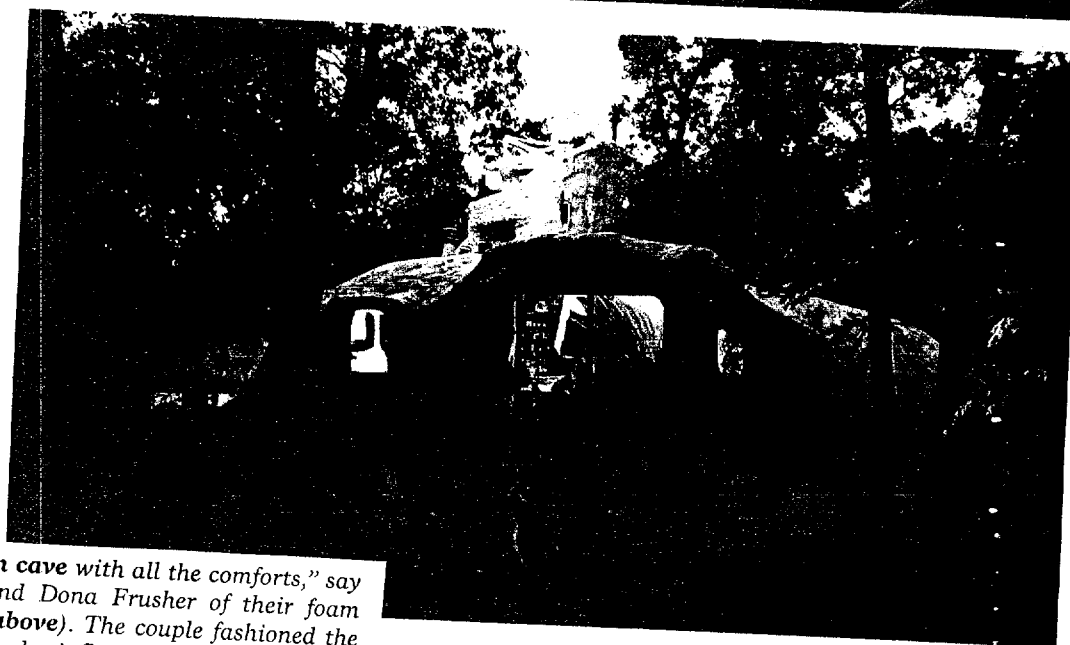

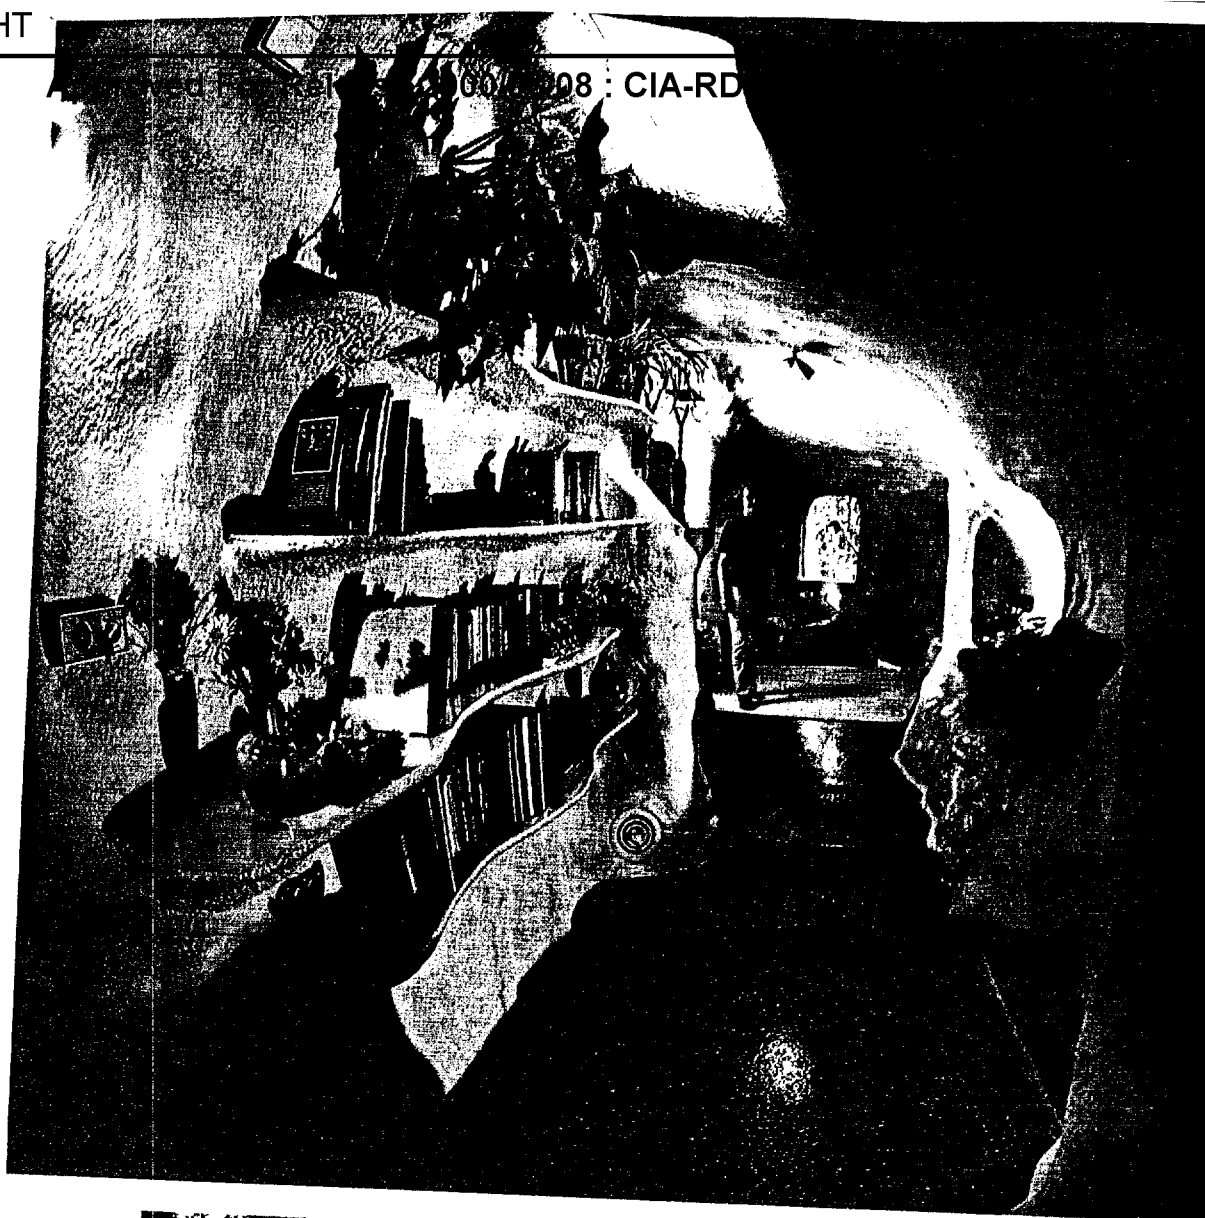

The target personality is a huntsman. He rides something in motion which can be of a scientific nature and he is in control. He is wearing casual clothes which are conducive to his work. I associate plaid and boots with this man. His work is risky and can even be considered a type of sport by some people. He is a large enough man in size, and knows how to shoot a gun. His personality is that of a pioneer. His environment is spacious and open and animals are associated with this man. He is an explorer of sorts, adventurous. However, I could see flashing red lights indicating that this individual has worked with life and death issues, which at times can be sad. He is married and a family man, but is "captain of his own ship".
